Secure shredding

Identity theft is the most costly security risk to businesses

Penalties of up to £500,000 can be issued if you are found in breach of the Data Protection Act. Under this act, you can not discard any customer, staff or supplier information which is still intact.

Our secure shredding service offers you a simple, environmentally friendly and cost effective solution geared towards protecting your business.

Shredding in 4 simple steps:

We will implement the most suitable shredding solution for you, supplying either consoles or bins with a lock and a slot, or sacks which can be ordered along with your office supplies online or via the telephone, using product code 54782X.

Step 1 - Fill up

Fill up the consoles, bins or secure sacks. You don't even have to remove staples or paperclips.

Step 2 - Collect

Call us when you are ready for a collection. Or we can schedule a collection weekly, fortnightly or monthly.

Step 3 - Shred

We will shred your documents on-site if required, or transport them to one of our secure shredding facilities.

Step 4 - Recycle

Once your documents have been shredded, they will be sent for recycling.

For more details on our secure shredding service or to request a copy of our brochure, please get in touch with a member of the team using any of the means below:
